Introduction

This Directory of Local Health and Mental Health Units has been compiled as of September 1, 1969,¹ from data reported to the Health Services and Mental Health Administration by State health and mental health officers and directors of local health units. This revised edition is the first since 1966.

Local Mental Health Units

For the first time, information on local governmental mental health units is included. These units, reported by 23 States, are listed immediately after the local health units for each State.

Local Health Units

All local areas which State health officers consider as organized to provide public health services are included. A part time health officer or administrative head is indicated by the symbol (†). The absence of medical, nursing, and/or sanitation personnel on the staff is shown beside the name of the unit in code, as follows:

- 1—No medical personnel.
- 2—No nursing personnel.
- 3—No sanitation personnel.
- 4—No medical and nursing personnel.
- 5—No medical and sanitation personnel.
- 6—No nursing and sanitation personnel.
- 7—No medical, nursing, and sanitation personnel.

Units are grouped by type of organization and listed alphabetically within each type. The four types of organizations are (1) County; (2) City; (3) Local health district; and (4) State health district.

Those units classified as local health districts comprise two or more contiguous counties or municipalities supervised by one health officer, with control vested in local authority. State health districts usually comprise several counties or municipalities. In some instances, however, a State or local district may cover a single county or only a portion of a county.

For those units which do not have the service of a health officer, or

¹ In some instances, information more recent than September 1969 was available and has been included.

an administrative head has not been designated, a vacancy is indicated, and the length of time the position has been vacant is stated.

Health officers or administrative heads serving more than one unit are identified by footnotes.

Included in the Appendix are the following tables :

Table 1.—Number of units rendering local health service and number of counties served, September 1969.

Table 2.—Total number of units by state, without medical, nursing, and/or sanitation personnel, September 1969.

Table 2a.—Summary, by type of unit, of number without medical, nursing, and/or sanitation personnel, September 1969.

Table 3.—Number of health units with full-time, part-time, or without administrative head.

Wisconsin	28	2	18	---	---	8	72	72	72
Wyoming	2	2	---	---	---	---	---	2	23

¹ In a few States, certain cities within counties included are not covered by the health department service of the counties in which they are located.

² Includes 8 counties which are served by city health departments, the counties being coterminous with the respective cities as indicated in footnotes "4" and "5".

³ Alaska is divided into election districts rather than counties.

⁴ Counties with only specific areas organized for local health service are not included.

⁵ One county (in the instance of New York, 5 counties) coterminous with a city is included. The cities involved are: New Orleans, New York, and Philadelphia.

⁶ Includes the county of Suffolk which is covered by the city health departments of Boston, Chelsea, Revere, and Winthrop.

TABLE 2.—Total number of units, by State, without medical, nursing, and/or sanitation personnel, September 1969

State	Type of personnel
